

Out of State Abortions, 2012-2015

This map illustrates the degree to which women are willing and/or forced to travel out of state for abortions. While there is inter-state movement in all cases, indicating that geographical proximity to clinics is a primary reason for crossing state-lines, the map also illustrates how states with the most restricted access to abortion and the fewest number of providers have high rates of women traveling to other states. The data suggests that increasing restriction of abortion, including the impending defunding of Planned Parenthood, will lead to great rates of out-of-state abortions.

Map Created by Laura Brown for Maps671, 2015.
Data from 2014 TIGER US Census shapefiles, CDC Abortion Data 2012-2015, National Abortion Federation webpage, and the pro-choice AbortionDocs webpage (filtered for Planned Parenthood Clinics).
CRS EPSG 102008.

	Out-of-state	Total-abortions	Percent-out-of-state	Out of State	State (%)
Missouri	5788	10954	52.84	3714	KS (33.9%)
South Carolina	4544	10396	43.71	2918	NC (28.1%)
Mississippi	3373	5485	61.49	1943	TN (35.4%)
Kentucky	1988	5367	37.04	931	TN (17.3%)
Pennsylvania	1959	35125	5.58	795	NJ (2.3%)
New Jersey	1527	23357	6.54	978	NYC (4.2%)
Indiana	1482	9800	15.12	567	IL (5.8%)
Wisconsin	1104	7796	14.16	743	MN (9.5%)
Arkansas	923	4284	21.55	681	TN (15.9%)
Alabama	916	8380	10.93	832	GA (9.92%)
